Portfolio: kanthurijaswanth.github.io/Portfolio

SUMMARY

Software Developer focused on mobile application development and specialized diagnostic tools. I build high-performance software that interacts directly with hardware to solve complex technical challenges, and I take projects from the first line of code through to deployment — shipping mobile APKs, desktop installers, and deployed web applications for real-time data analysis and monitoring. I thrive in environments where software meets hardware, particularly in the telecommunications and diagnostics sectors.

TECHNICAL SKILLS

Languages	Python, Java, C, Kotlin, JavaScript, TypeScript
Frameworks	Django, Next.js / React, Jetpack Compose, TensorFlow / Keras
Tools & Cloud	SQL / PostgreSQL, Supabase, AWS (EC2, S3, API Gateway), Docker, Git, ServiceNow
Concepts	Mobile & desktop development, REST APIs, OCR, networking / iPerf, machine learning

EXPERIENCE

Software Developer, MakeMyTechnology — Bengaluru Jul 2025 – Present

Project: COTS — Network Diagnostic Tool (similar to QXDM)

- Built the mobile APK from scratch for on-the-go monitoring and developed the Windows installer for laptop use.
- Implemented core features to track real-time network health: signal strength (RF parameters), data speeds via iPerf, and connectivity stability through ping tests.
- Integrated the software with hardware such as Raspberry Pi and SIM modules to accurately capture and log drive-test data, end to end.

Cloud Computing Intern, Brain O Vision — Remote Internship

- Built and deployed a cloud-native application on Amazon Web Services using EC2 for compute and S3 for asset storage.
- Exposed and managed application APIs through Amazon API Gateway, learning to architect and ship an application the cloud-native way.

PROJECTS

TicketResell Kotlin, Jetpack Compose, Supabase

- Open-source Android marketplace for last-minute, non-cancellable bus & train tickets, featuring on-device ML Kit OCR, a custom 16×16 perceptual-hash duplicate-image check, and consent-based contact sharing over real-time chat.

Code: github.com/kanthurijaswanth/Ticket_Seller

Student LMS (live: lms-m3bk.onrender.com) Next.js, Prisma, PostgreSQL

- Deployed a full-featured Learning Management System with a multi-language coding judge (Python via Pyodide WebAssembly; Java / C++ / Go via Judge0), anti-cheat proctored quizzes, auto-issued PDF certificates, and gamification.

Live: lms-m3bk.onrender.com

Emotion-Music Recommendation System Python, TensorFlow, OpenCV, Flask

- Built a real-time facial-emotion CNN (FER2013, 7 classes) that maps the detected mood to a matching Spotify playlist via the Spotipy API, served through a live multithreaded webcam stream.

Code: github.com/kanthurijaswanth/music-recommendation-system · Files: [Drive](#)

Food Ordering Chatbot & Plant Identification

Python, APIs

- A conversational bot that compiles menu selections into an order for a restaurant, and a plant-species identifier using the Plant.id API that returns confidence-ranked results parsed from JSON into readable text.

EDUCATION

B.Tech, Computer Science Engineering

2021 – 2025 · 85%

K.S.R.M. College of Engineering

Intermediate (MPC)

2021 · 72%

Pushpagiri Residential Public School (CBSE)

Class X (Secondary School)

2019 · 71%

Pushpagiri Residential Public School (CBSE)

CERTIFICATIONS

- ServiceNow — Certified System Administrator (CSA) — [View certificate](#)
- ServiceNow — Certified Application Developer (CAD) — [View certificate](#)

LANGUAGES

English, Telugu, Hindi
